Summary

iOS Engineer with 5+ years of experience in building, scaling, and deploying iOS applications across multiple domains. Focused on writing clean, maintainable code and creating smooth, user-friendly experiences. Passionate about delivering high quality apps and staying up to date with the latest iOS trends.

Experience

Freelance iOS Engineer

SEP 2024 - PRESENT | BERLIN, GERMANY

- Developed an intranet application featuring articles, events, job listings, and user profiles, enhancing internal communication and engagement.
- Currently working on an AI-driven health and wellness app, focusing on personalized meal plans, workouts, and supplement recommendations.

Getir Germany GmbH | iOS Engineer

APR 2022 - NOV 2023 | BERLIN, GERMANY

- Managed and optimized the Getir Bitaxi domain in the Turkish market, driving operational efficiency and user growth.
- Developed and integrated a driver-rider messaging feature, reducing call costs by 10% and improving communication.
- Led the design and implementation of a pre-tip feature, increasing driver acceptance rates by 70% and enhancing service reliability.
- Implemented real-time push notifications, improving user engagement and ride status updates for a seamless experience.
- Launched a campaigns and announcements tab, boosting user awareness of promotions and key updates.
- Redesigned and optimized the ride cancellation flow, reducing cancellation rates and enhancing user satisfaction.
- Led the development of the Earthquake Donation feature, enabling charitable contributions through the app.
- Implemented unit testing and conducted code reviews, ensuring maintainability and high coding standards.

Monstarlab EMEA | iOS Developer

MAY 2019 - MAY 2021 | BERLIN, GERMANY

- Developed and maintained iOS applications using Swift and contributed to Flutter-based projects, collaborating with a multi-platform team in an Agile environment.
- Refactored AutoLayout implementation, transitioning from an imperative to a declarative approach, improving code readability, maintainability, and performance.
- Managed CI/CD pipelines with Bitrise and led app deployments using Fastlane, optimizing automation and release efficiency.

IndiaNIC Infotech Ltd | Software Engineer iOS

FEB 2016 - OCT 2017 | AHMEDABAD, INDIA

- Built and shipped iOS features from specs to App Store release, enhancing app functionality and ensuring smooth deployment.
- Identified and resolved bugs, ensuring app stability and optimal performance.
